

This sheet makes two sets of labels. The top row of labels shows what the labels will look like if you disclose information about the subcategories for the eligible renewable fuel category. The bottom row of labels shows what the labels will look like if you do not itemize these subcategories. **Note that the totals under "Product Name" do not always add up to 100%. This is due to rounding, and should be fixed.** For example, if the total shows "101%", check cells N50..N59 on the sheet the data is coming from. If certain values are near the top of the range in which they would round up or down, take note, and in the corresponding cell of your label write in a lower number that rounds to the same value; e.g., if the formula in the cell refers to the value 13.49%, you could write in 12.51%. Keep making such changes, if necessary, until the values on the label add up to 100%. Another change you may wish to make, if your label is describing a product that is supported 100% by specific purchases, is to put in zeroes for some components. The formulas will put in "<1%" if the calculated value is anything less than half a percent, including zero. Also, if you are going to use these labels directly from this program, make sure that you use your own product name and company name and that you fill in the blank in the first footnote. None of the cells on this sheet are protected, so be careful not to change them inadvertently.

#### Fourth Quarter

## 2008 POWER CONTENT LABEL

ENERGY RESOURCES	LADWP Power* (projected)	LADWP Green Power** (projected)	2007 CA POWER MIX*** (for comparison)
<b>Eligible Renewable****</b>	<b>8%</b>	<b>100%</b>	<b>10%</b>
-- Biomass & waste	1%	-	<1%
-- Geothermal	<1%	-	2%
-- Small hydroelectric	5%	25%	6%
-- Solar	<1%	-	<1%
-- Wind	2%	75%	2%
<b>Coal</b>	<b>44%</b>	<b>-</b>	<b>32%</b>
